

Email Example to Notify your Clients about your NETTRAKK Subscription

I am very excited to let you know that I have invested in a tool that is going to provide you with dynamic data regarding the net worth you have in your home, and any opportunities that exist to build wealth through home ownership...and it is free to you.

NETTRAKK will send you an email every month reminding you to calculate your updated home valuation. Create your password and confirm your mortgage details, and then every month you enter the Summary and simply click on the "Calculate Current Value" button. This will provide you with a current market value on your home that is tied to MLS and will track how your property value changes over time with each mortgage payment you make.

There are also various intuitive calculators that calculate valuable information for you based on your specific data and this will help you understand the opportunities for interest reduction, home purchases, debt consolidations, and more.

Within the next week or so you will be receiving a Welcome Email from myself and NETTRAKK that will outline all the benefits of the app, along with the ability to "Accept" the subscription and set up your profile. Once your account is set up, you will receive an email around the first Thursday of every month giving you access to the NETTRAKK Net Worth Summary where you can update your current market value and watch your home equity grow!

It is best to set up your account through the Welcome Email, but you can still set up your account via the monthly emails. If you need assistance at anytime setting up your profile you can always select "Forgot Password" and then you will be prompted to complete your account details again. *Please do not select "Sign Up" – I have already signed you up into the system based on your email address.

I have enjoyed helping everyone of you, and your family and friends over the years, and this tool is something that I can "give back" that will provide you with both value and knowledge.

If you have any questions about NETTRAKK please feel free to contact me.
